

Reel Return
Please Recycle

Blue Diamond pipe is shipped on metal reels, ranging in size from 48" – 120". The most common size is 96". The reels may be returned to Blue Diamond, either fully assembled or preferably, broken down to maximize the number that can fit on a truck.

Typically, a truck can return up to 16 empty reels (assembled) to Blue Diamond or 80 reels that have been broken down (bars are removed and returned with the wheels, this is also done sometimes when storage is an issue). Depending on the location, we will pick up as few as 6. Returnable reels are not bent or broken and have no missing metal staves.

Please do your part to protect the environment and reduce energy consumption by recycling your empty reels.

When a site has empty reels, they should contact our Shipping Department via email shipping@bdiky.com or via telephone Kelly Lambert or Miranda Hatfield (606) 248-8078 and we will arrange for a truck to pick up the reels.
